

SECURING PEACE OF MIND
FOR OVER 35 YEARS

NOW, PROVIDING PEACE OF MIND
WIRELESSLY!

Introducing:

XTL

Wireless Security Systems
Made for Business

Selecting your security system is serious business. You need total confidence that your employees and facility are secure 24/7/365. But you don't want to spend more than you have to for unnecessary bells and whistles that make your alarm more complicated and expensive than it needs to be.

The XTL Wireless Security System gives you features and functions that not only help you protect your business; they help you manage your business, no matter where you are.

SOLID, CELLULAR CONNECTION

Your security system is monitored via a reliable cellular connection. Compared to older technology that uses a conventional phone line, your cellular connection won't be lost due to down trees or bad weather, and it can't be cut by a burglar.

DESIGNED FOR BUSINESS

The XTL provides made-for-business features like Late-To-Open / Early-To-Close alerts and a Traffic Count report that's a useful tool when managing staffing levels or hours of operation.

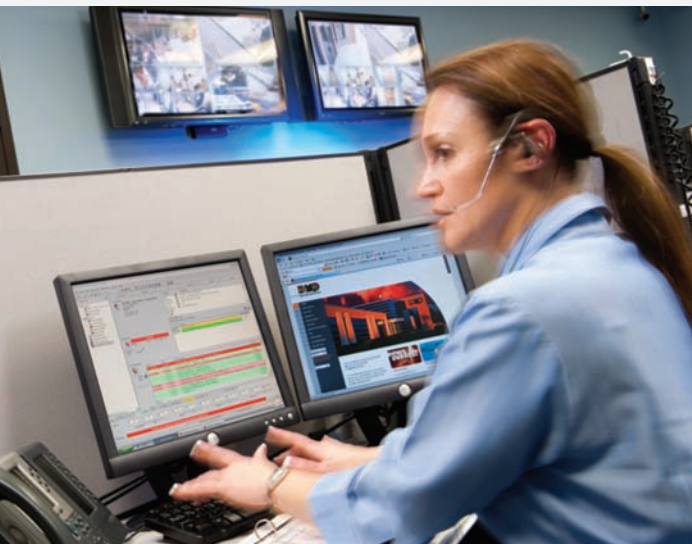

The XTL includes features and functions typically found only in large, more expensive, systems:

- 6 areas: Selectively protect six separate areas of your business
- 30 user codes: Assign the desired security authorized to each employee.
- 4 keypads: Position keypads at multiple interior or exterior doors.
- 100 – event memory
- Two-way wireless outputs
- Supports up to 8 two-way wireless key fobs
- Supports two-way wireless sirens
- Supports 28 wireless zones
- On-board cellular communications allows In Touch - Messaging Features for any cell phone
- Uses DMP SecureCom Wireless Cellular Communications

Selecting your security system is serious business. You need total confidence that your employees and facility are secure 24/7/365. But you don't want to spend more than you have to for unnecessary bells and whistles that make your alarm more complicated and expensive than it needs to be.

The XTL Wireless Security System gives you features and functions that not only help you protect your business; they help you manage your business, no matter where you are.

SOLID, CELLULAR CONNECTION

Your security system is monitored via a reliable cellular connection. Compared to older technology that uses a conventional phone line, your cellular connection won't be lost due to down trees or bad weather, and it can't be cut by a burglar.

SERIOUS BUSINESS SECURITY

For small to medium businesses, the XTL provides all the features you need in a compact, easy-to-use alarm system. Contact any of the experts at KEV Security to learn more about the XTL Security System customized to your businesses.

STAY IN TOUCH

Remotely control your alarm system with the built-in cellular capability of In TouchSM Messaging that lets you send commands to your alarm system via text messages and receive alerts regarding system status and activity.

- Turn your system on or off from your cell phone
- Check the status of your system
- Receive messages to as many as three phone numbers
- Be notified each time your system is armed or disarmed

FREEDOM TO CUSTOMIZE

In addition to the small, easily concealed alarm panel, each system includes:

- An easy-to-use keypad
- Sensors at selected doors and windows
- Sirens that create an audible warning when there's an intruder
- Motion sensors mounted on the wall or ceiling

Working with one of our security professionals, you can add components to create a system tailored to your business' size and security needs:

- Control building automation systems, exterior lighting, sprinklers, and more with integrated modules
- Glass-break sensors
- Smoke detectors that alert your system to automatically call the fire department
- Easy access capability that lets your system to automatically call the fire department

Complementing the XTL is a wide array of wireless accessories, such as keypads, motion detectors, keyfobs, door contacts and smoke detectors.
